

Privacy Wall

Business changes too quickly to rely on inflexible interiors.

Organizations adjust, technology fast-forwards, and new demands arise, quickly transforming the requirements of work environments. Mobility, versatility and performance are the order of the day.

Environmental Sensibility.

Superior interior environments can reflect a responsible environmental perspective. Privacy Walls contain 30% recycled content, is 100% reusable, and 90% recyclable at the end of its very long life.

Choice.

Pathways offers Privacy Wall and Privacy Wall Glass Selections, fully compatible and interchangeable elements that create workplaces that are simply extraordinary.

Performance.

Privacy Wall provides more performance, flexibility, and aesthetic appeal than any other moveable wall available. And it outperforms traditional construction, during installation, use and reconfiguration.

Privacy Wall

Put every space to work.

Create the spaces you need, from private offices and team areas to meeting rooms and public spaces, for the right combination of privacy and collaboration vital to high performance environments.

Sound economics

Innovative Privacy Wall offers significant advantages over conventional fixed walls, including less costly installation, moves, and changes; simplified construction requiring fewer skilled trades; long-term flexibility and reusability; and accelerated depreciation for faster payback and improved cash flow.

Advanced aesthetics

Privacy Wall complements any aesthetic, from classic to cutting edge. Create beautiful, monolithic walls rich with colors and fabrics or showcase fresh, contemporary walls of floor-to-ceiling glass. Choose from an inspirational selection of visual options, including glass, paint, vinyl, fabric and wood surface materials.

Performance standard

Solid steel construction provides long-term durability and consistent noise control properties with an acoustical rating of 43 STC, exceeding conventional drywall.

Environmental sustainability

Privacy Wall contains 30% recycled material content, low emitting materials (no PVCs or VOCs) and generates no on-site off-gassing. It creates significantly less construction waste compared to traditional construction. And when it's time to reconfigure, it's 100% reusable. At the end of its long service life, the system is 90% recyclable. All reasons Privacy Wall will contribute to LEED® certification credits.

PATHWAYS®

Privacy Wall

The shape of the extraordinary workplace.

Privacy Wall Glass Selections

More aesthetic options.

Glass Selections spread light and energy throughout the workplace. Full-height glass, combined with a modern anodized aluminum frame profile creates a feeling of openness. Glass transoms and clerestory windows add graceful architectural elements, while stunning glass walls up to 10 feet wide present dramatic open expanses. All Glass Selections install and change just as simply as our standard Privacy Wall.

BENDHEIM

Our strategic alliance with Bendheim, the largest provider of specialty glass in North America, provides an expansive glass offering. Nine glass types have been carefully selected and “graded in” to simplify the ordering process. The nine glass types offer a broad range of privacy from thinly veiled to completely private. The use of Bendheim glass transforms spaces and allows the designer to establish the desired sense of privacy.

Fundamental flexibility

Privacy Wall Glass Selections include an elegant butt glazed solution, a unique corner unit, and an anodized aluminum frame that perfectly matches Pathways Post and Beam. All Glass Selections and Privacy Wall products provide the performance you need, give the look you want, all with the flexibility of moveable walls.

PATHWAYS®

Privacy Wall Glass Selections

Work made visible, the workplace made elegant.

Simple engineering.

Moveable Privacy Walls arrive fully assembled and ready for rapid installation, reducing installation time by as much as 70%. These durable steel walls are 100% reusable, and are easily moved and changed to support rapidly changing business needs.

Time for a change

Two private enclaves are originally constructed in just 8 hours. Business calls for a conference room, and the space transforms in only 4 hours. First the walls separating the two enclaves are removed. The door moves to the far side of the room for easy access. A PolyVision™ whiteboard system replaces the shelving. It hangs at practically any height in 1" increments (as do storage and worksurfaces). A conference table replaces the two individual tables. What it all becomes tomorrow is simply up to you.

Two private offices or enclaves quickly change to a larger meeting space.

Privacy Wall Standard Glass

Integrated Products

Privacy Wall integrates seamlessly with the entire Pathways portfolio — Pathways Floors and Wiring, Post and Beam, Steelcase System Solutions, and Architectural Lighting. Pathways high performance workplaces are easy to install, simple to change, and clearly cost-effective.

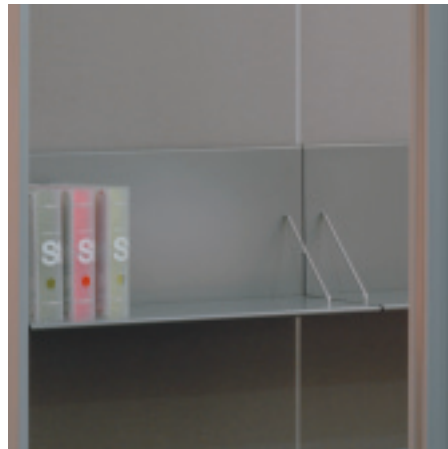

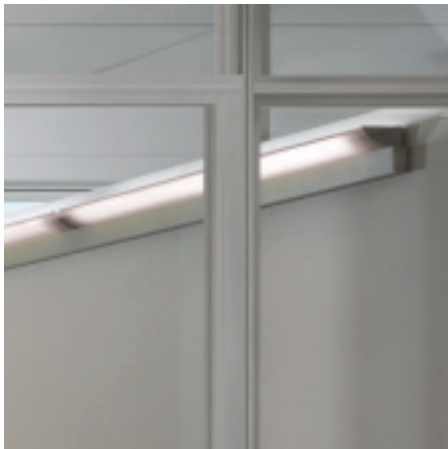

Open convenient spaces

Spaces for short-term use are easily created with Pathways Privacy Wall, freestanding desks and systems furniture panels for appropriate privacy. Technology can be accessed through the walls, panels, wireless access point, or Pathways Access Floor.

Technology at hand

Privacy Wall can be pre-wired, specified with modular power, or accommodate customer-specific technology. Use the same modular wiring system to integrate with Steelcase Answer®, Montage® or Pathways Technology Wall.

The strong silent type

Add shelves, bins, worksurfaces, or whiteboards, at practically any height in 1" increments. Solid and durable Privacy Wall requires no additional reinforcement, and achieves an acoustical rating of 43 STC, exceeding drywall construction ratings.

Make connections, beautifully

Privacy Wall integrates elegantly with the building architecture, technology and furniture. Add high image, productivity-boosting Lightolier® Lighting (above). Incorporate architectural Post and Beam with both Privacy Wall and Glass Selections (right), a unifying architectural element that delivers technology and helps define spaces. The fit and finish are consistently smooth and true.
