# Connecting Communities

Thank you for joining us at **Connecting Communities: The Hybrid Work Tour**. We hope you were inspired by the insights, spaces and technology solutions that support collaboration and innovation.

Inside this guide, you'll find the applications and products that help make hybrid work better.

# Working Together to Make Hybrid Better

Steelcase is working alongside tech leaders to provide hybrid collaboration solutions today and to prototype, iterate and evolve for tomorrow.

Working together with our partners we are striving to make space the best that it can be for supporting the new ways of working.

*The Hybrid Work Tour*

# The Community Table

## The Community Table

This inviting space encourages coworkers to gather for coffee chats, lunch breaks, or a quick pause before a meeting, creating natural opportunities to build relationships. It's a visible, welcoming spot in the workplace where people can connect, catch up, or send a quick email. Designed to support wellbeing, it also offers a moment of calm in the middle of a busy day. Short breaks here help reduce stress and improve focus, making it a valuable destination for both connection and clarity.

# The Huddle Room

## The Huddle Room

Huddle rooms are among the most popular spaces for teams of 3–5 to collaborate quickly and effectively. With Microsoft Teams Room integration, meetings are easy to schedule, locate, and launch. The Ocular curved table ensures everyone is clearly seen and heard, while integrated surface power keeps devices charged and participants engaged. Designed to flex with your space, the Ocular Frame features a fabric finish that adds sound absorption for a quieter, more comfortable environment.

# The Hybrid Boardroom

## The Hybrid Boardroom

In the Hybrid Boardroom, thoughtful table shapes, cable routing, and camera positioning ensures everyone is seen and heard, providing better experiences for people to meet, share, and collaborate. The Ocular Frame and Ocular Sightline solutions make hybrid meetings effortless with streamlined tech integration. Whether hosting single, dual, or ultra-wide monitors, Ocular Frame ensures great engagement with remote meeting participants, shared content, and meeting chats and reactions.

# The Flexible Team Space

## The Flexible Team Space

This open, collaborative space is designed for spontaneous brainstorming and quick team huddles. With the Microsoft Surface Hub, teammates can easily share screens and whiteboard digitally with remote teammates. The standing-height table and stools support active postures, encouraging movement and engagement. Whether you're sketching out ideas or solving problems on the spot, this space adapts to your work style and keeps collaboration flowing.

# Open Plan Collaboration

## Open Plan Collaboration

The Ocular Coupe Tower is a versatile, collaboration-ready solution that seamlessly blends technology and furniture in huddle spaces. With integrated power, cable management, and a display and camera mount, it supports on-demand teamwork in any setting. An easy-access tech panel keeps power organized, simplifying housing, routing, and mounting. As hybrid work continues to grow, WorkValet is a necessity by offering secure, convenient storage for personal belongings for movement throughout the business district.

# Ocular View

## Ocular View

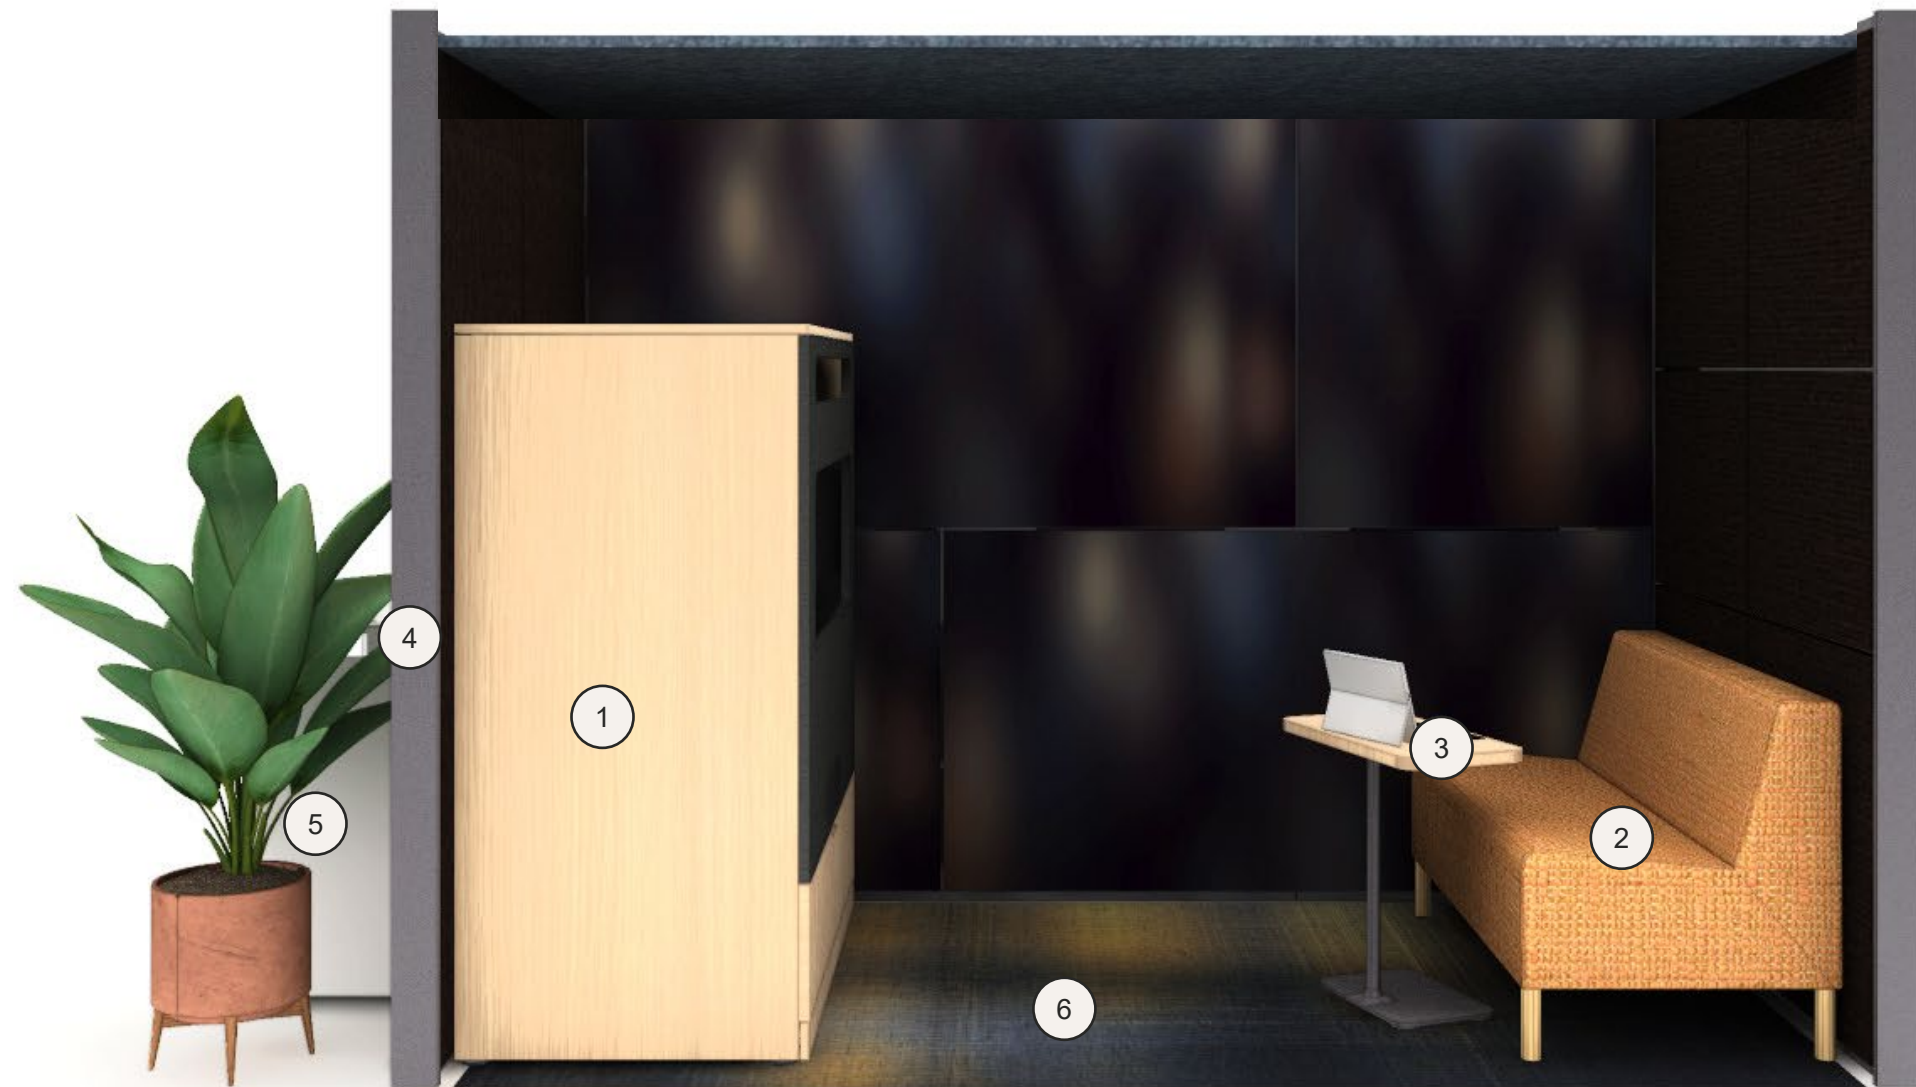

Co-developed by Steelcase and Logitech, Ocular View is an immersive, realistic and personal meeting experience that makes you feel like you're together, even if you're miles apart. With natural eye contact, life-size presence, and distraction-free design, virtual meetings now feel more human. In a time when 87% of employees feel disengaged, this solution supports wellbeing by making remote collaboration feel truly connected.

# High-Performing Ancillary Lounge

## High-Performing Ancillary Lounge

This lounge setting designed to spark natural conversation and effortless collaboration. This space encourages participation, making it ideal for both casual chats and informative meetings. The space supports mixed postures, whether lounging, sitting upright, or standing due to thoughtfully placed ottomans, tables, and accessible power. For added flexibility, the Rally Board 65 Cart allows the camera to be positioned above or below, enabling meetings and whiteboarding wherever inspiration strikes.

Research & Insights

---

# Unprecedented Change & Uncertainty

**Work has changed more in the  
past five years than in generations.**

Change fatigue contributes  
to low employee engagement  
and falling productivity growth.

New patterns  
of work need  
*new patterns  
of space*

## Forces Changing Work

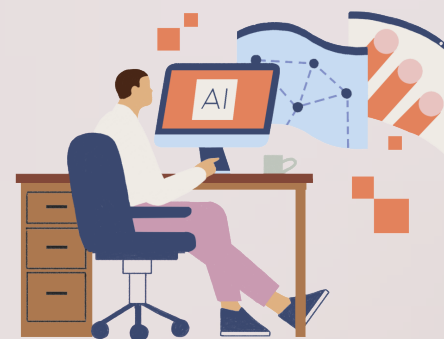

Living on Screen

Sustainability Mindset

AI Supercycle

Wellbeing Urgency

## We're in more virtual meetings than ever before

56%

Include remote participants

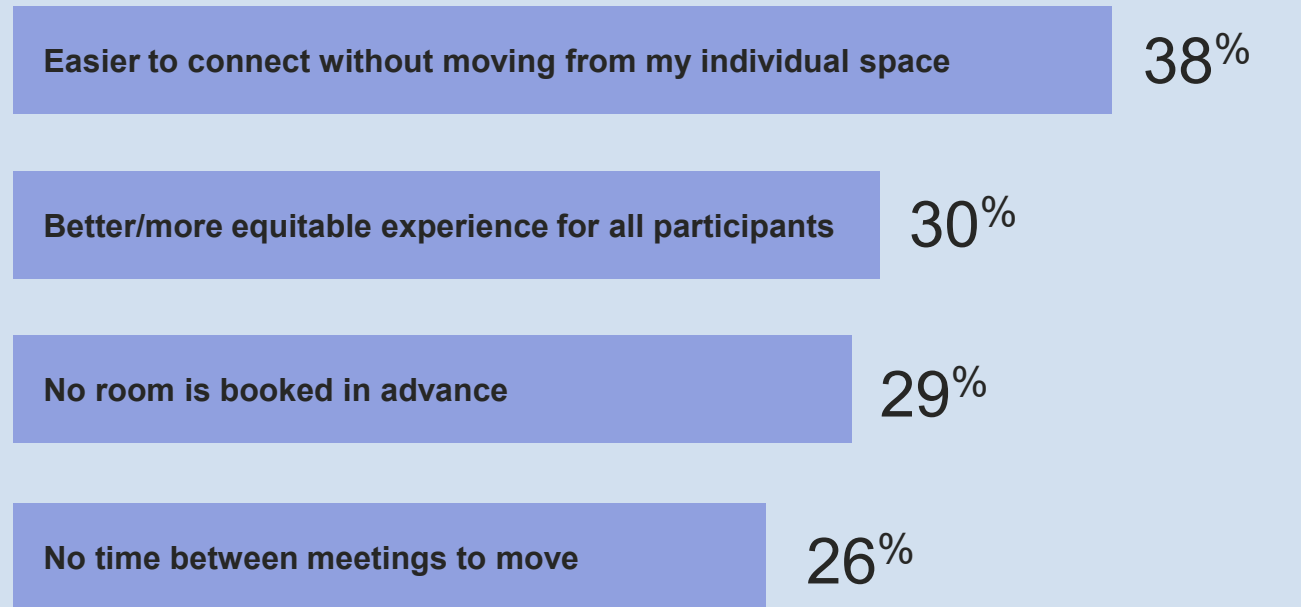

44%

Fully in-person

*Steelcase Global Research*

## People choose convenience over connection

50% of employees do not leave their desks for video calls. Here's why:

*Steelcase Leader Research*

## Macro Shift

# Living on Screen

Screen-based interactions have overtaken in-person communications.

## Employees are leading the adoption of AI at work

Employees

# 75%

Of global knowledge workers use AI, nearly doubling in six months

Leaders

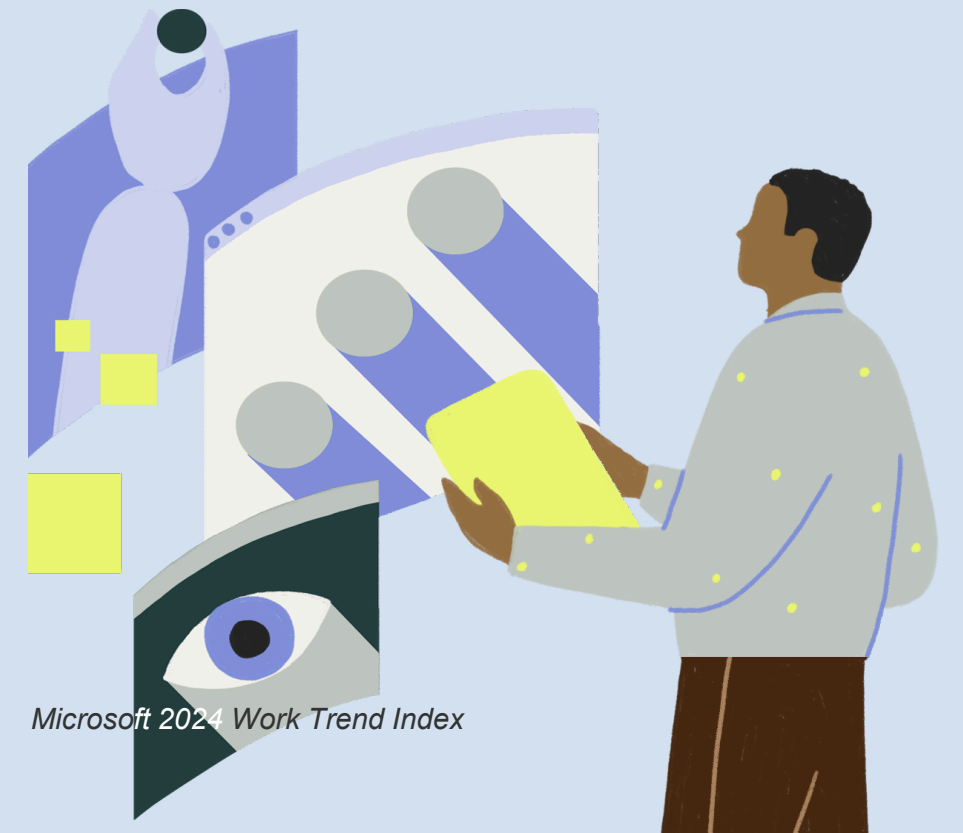

# 60%

Of leaders worry their organization lacks a vision to implement AI

*Steelcase Global Research*

## AI skills are now “must-haves”

66% of leaders would not hire someone without AI skills

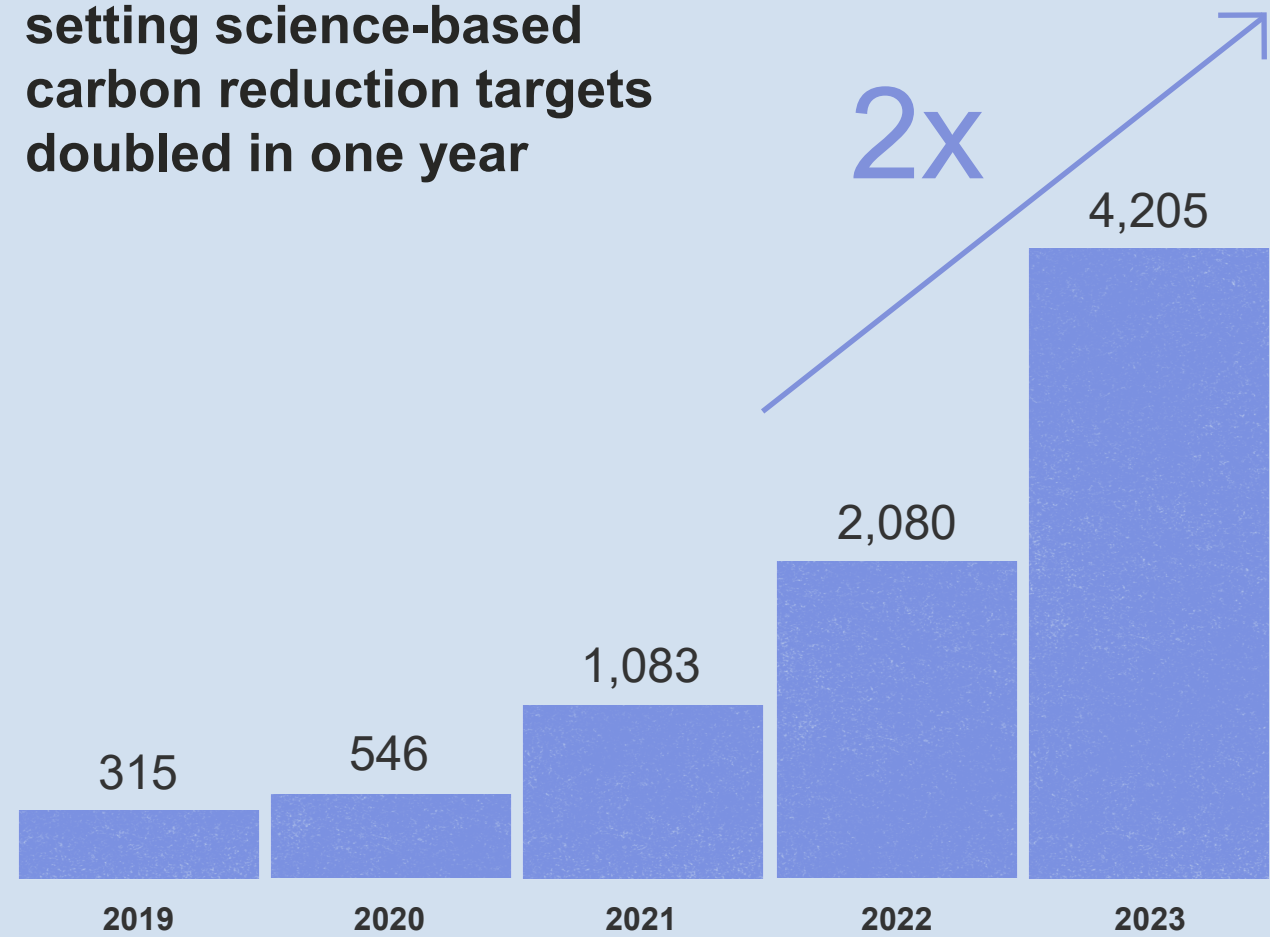

*Microsoft 2024 Work Trend Index*

Macro Shift

# AI Supercycle

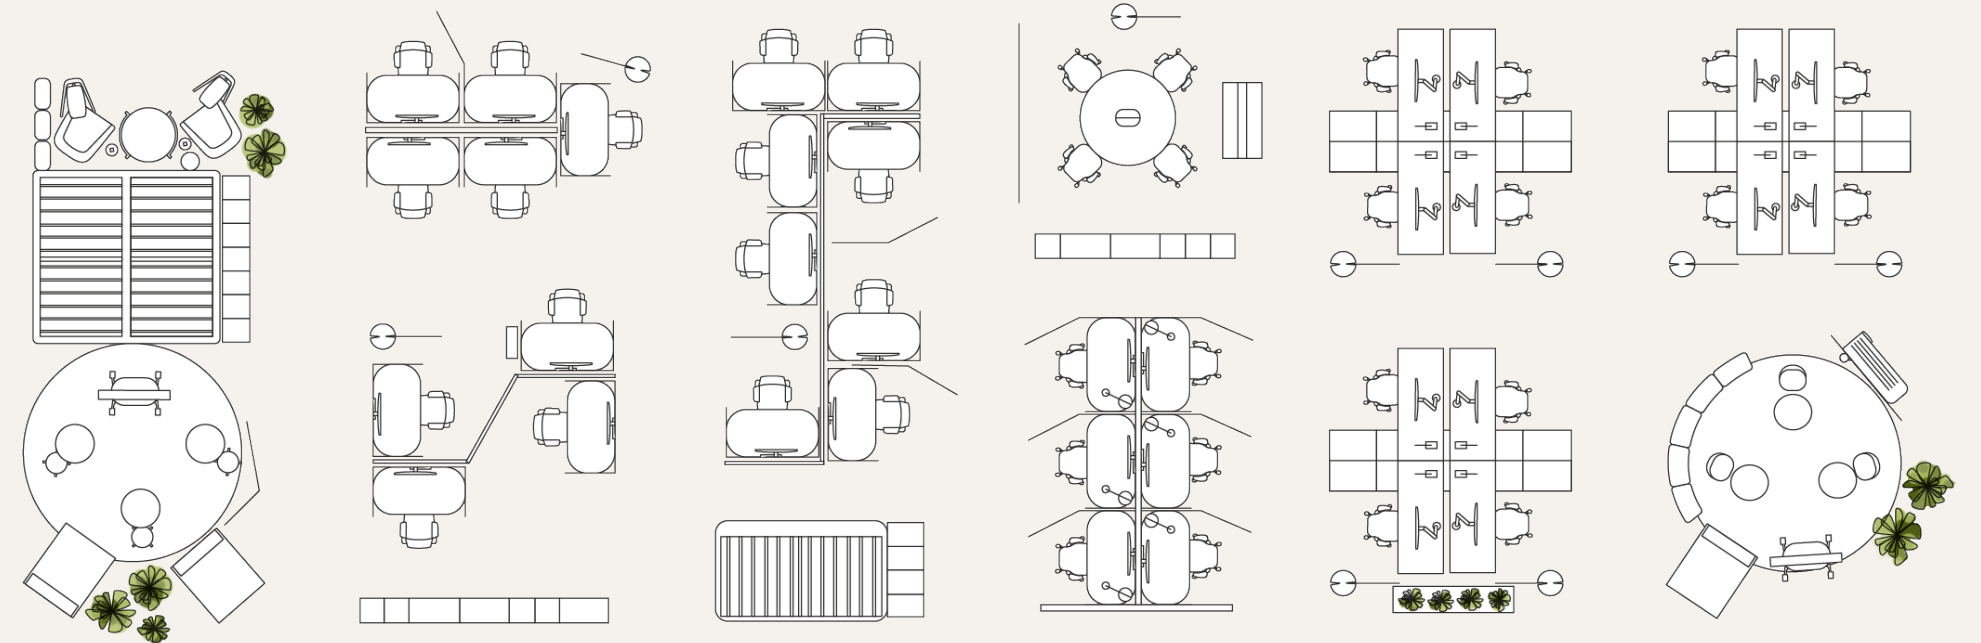

Employees are rapidly adopting AI and leaders know they need to leverage it more.

The number of companies setting science-based carbon reduction targets doubled in one year

Science Based Targets initiatives (SBTi)

Workplaces designed with a range of settings are easier to change and more sustainable

Macro Shift

# Sustainability Mindset

Organizations prioritizing sustainability need flexible and adaptable workplaces to help achieve their goals.

## Many employees are not thriving

All Employees

# 66%

Of employees are not thriving

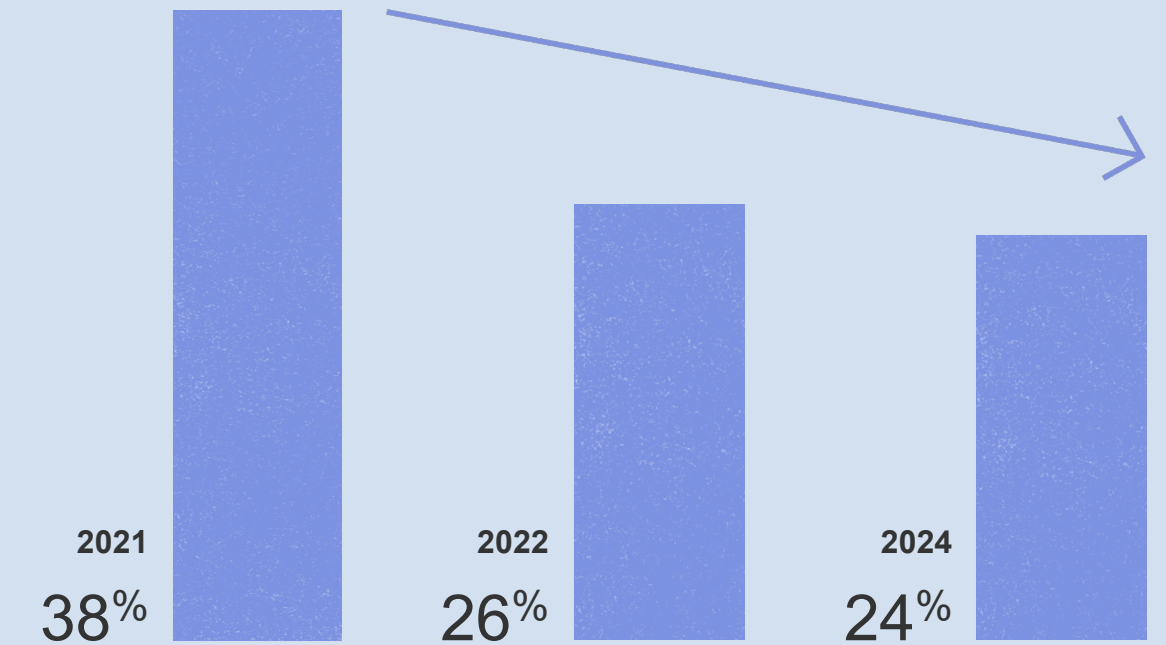

Millennials & Gen Z

# 69%

Of employees under 35 are not thriving

*Gallup State of the Global Workplace*

## The number of U.S. employees who believe their employer cares about their wellbeing keeps dropping

*Steelcase Employee Research*

## Macro Shift

# Wellbeing Urgency

Employees have new expectations that organizations will take action to support their mental health.

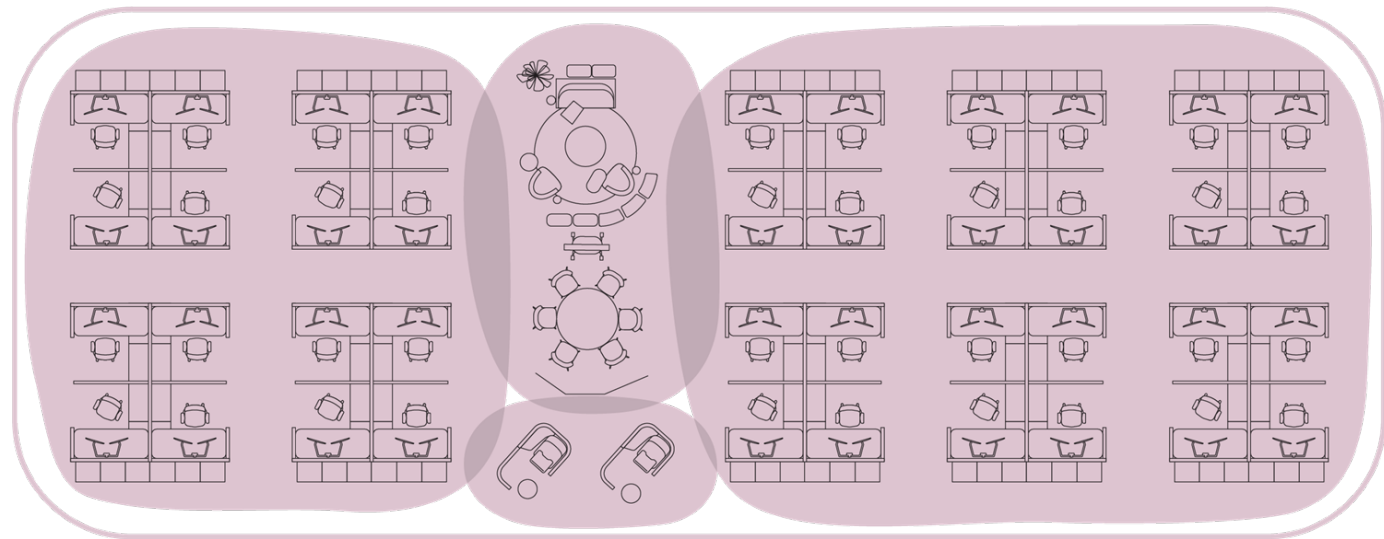

## Business District

A diverse range of shared spaces where people come together to meet, share, brainstorm and collaborate — an environment that sparks creativity and innovation.

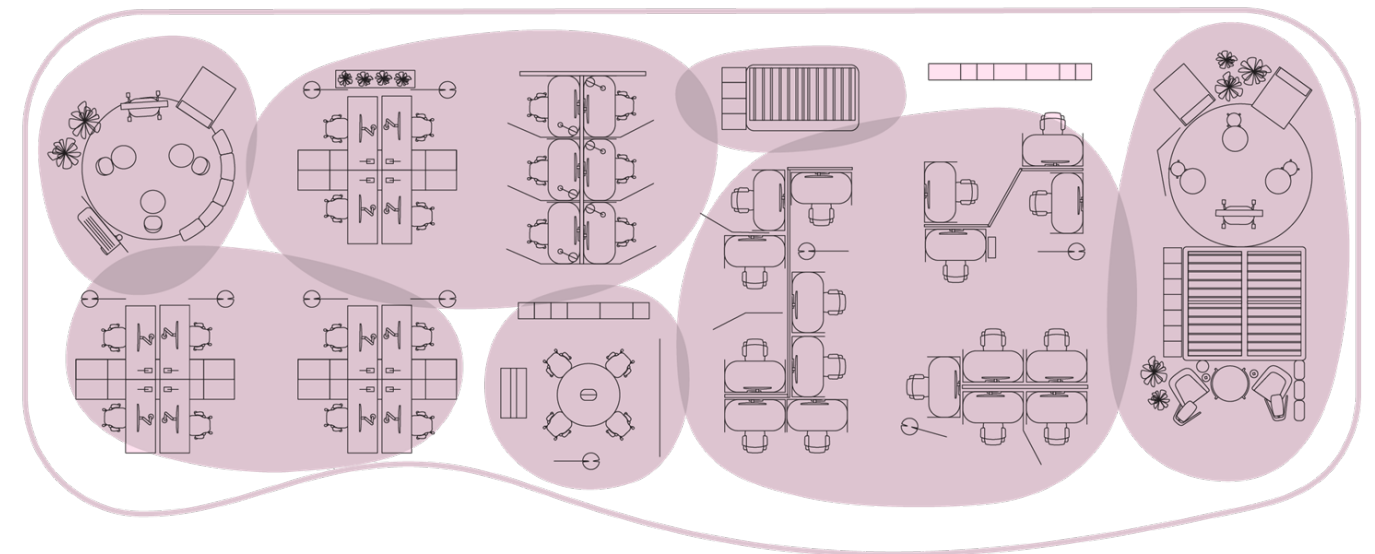

# Applying Community-Based Design Principles

Before & After

**From:**

Single-purpose areas  
One-size fits all  
Repeating patterns

**To:**

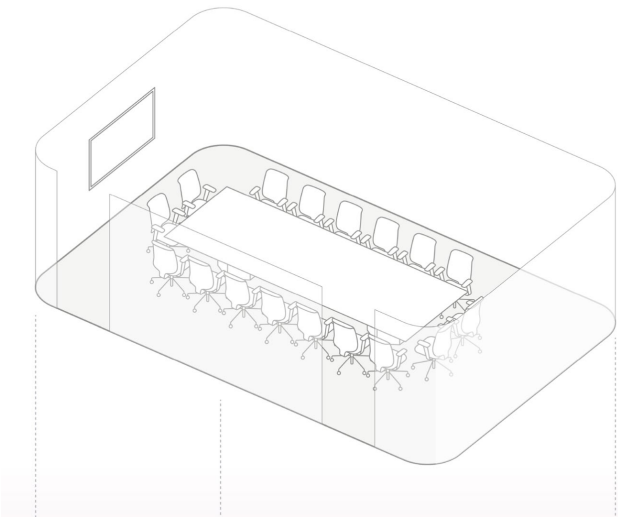

Purposefully mixed-use  
Diversity of spaces  
Offers choice & control  
Responds to unique needs of the organization

# Reinventing Five Essential Spaces

Consider the issues and explore solutions within the applications on the *Connecting Communities Tour*

## The Underused Conference Room

Transform a single large conference room into four spaces where people can collaborate, focus and rejuvenate.

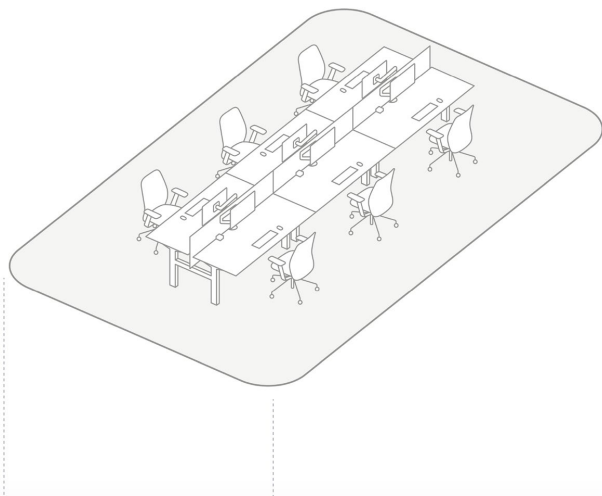

**Before**  
A traditional, large conference room is often unused or underutilized

## The Overexposed Bench

Benching, where people face one another, creates visual distractions and provides little noise mitigation.

Reorient desks and add a range of privacy solutions to control nearby distractions.

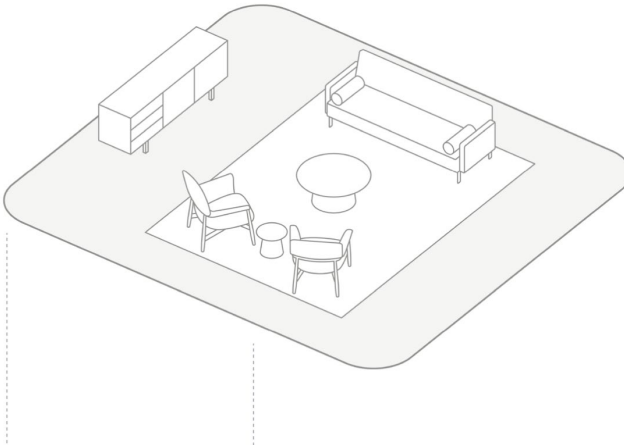

**Before**  
Rows of benching, with people facing one another, create visual distractions and provide little noise mitigation.

## The Low-Performance Lounge

Beautiful spaces too often sit empty because they don't help people get work done.

Design for privacy, posture, proximity and presence to create desirable, high-performing spaces.

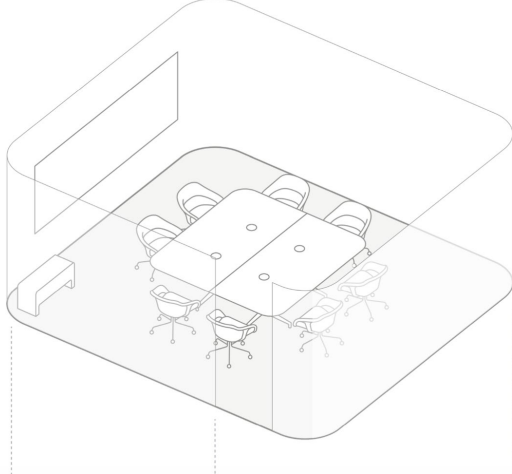

**Before**  
Lounge spaces are often underutilized because furnishings lack key performance elements.

## The Inflexible Meeting Room

Typical conference rooms can limit how teams collaborate and inhibit creative problem-solving.

Add mobile furniture, technology and light-weight markerboards to encourage in-person and remote participants to engage and adapt the space to their needs.

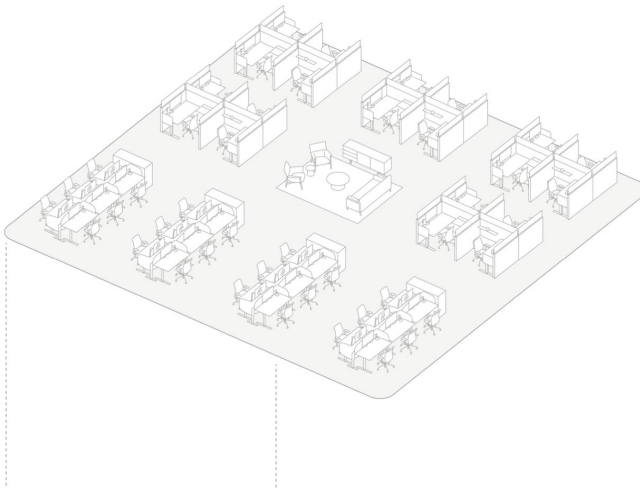

**Before**  
Typical conference rooms can limit how teams collaborate and inhibit creative problem-solving.

## The Typical Team Space

A neighborhood focused on uniformity doesn't consider the ebb and flow of solo to group work throughout the day.

Replace single-purpose areas and monotonous patterns with mixed-use spaces that give people access to a range of experiences for different tasks.

**Before**  
A neighborhood focused on uniformity doesn't consider the ebb and flow of work in which people must toggle between working alone or together.

*The Hybrid Work Tour*

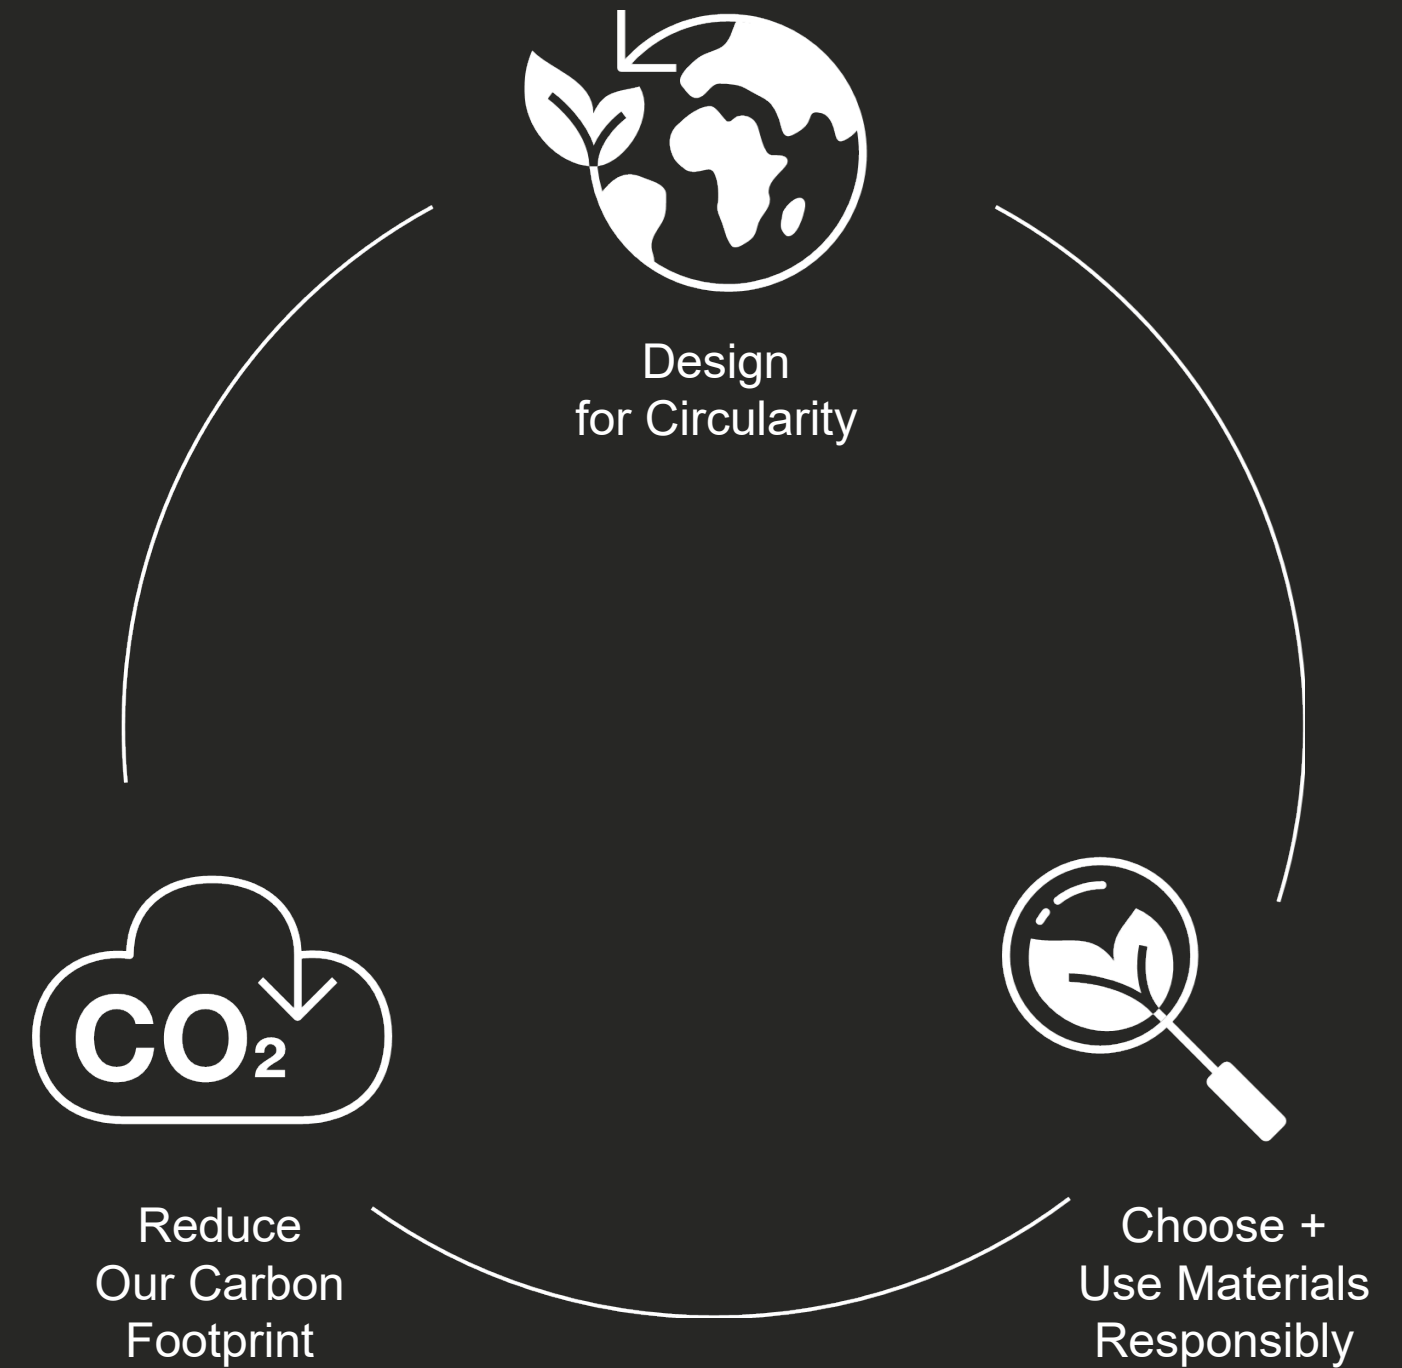

# Connecting Communities

Sustainability

---

Better Futures — Planet

We're doing better for the planet by *transforming our business and committing to a net-zero future* to build a more sustainable and resilient world.

# Product Sustainability Stories

## MIGRATION DESKING COLLECTION

Migration Intro, Migration Pro, & Migration Pro with Boost are now offered with FSC-certification, ensuring the wood originates from sustainable forests protected from clear-cutting and deforestation.

## OCULAR COLLECTION

Most of the Ocular collection has a high level of product ingredient disclosure.

## Everwall™

Everwall is a modular, prefabricated wall system designed with the principles of reducing waste on site, reusing materials and recyclability.

## CAFÉ LEATHER

Café leather is a by-product of the food industry, diverting hides from entering landfill. It is finished without use of solvents or lead. It is produced in a facility which is powered by 100% green electric supply and green natural gas.

## CARBON NEUTRAL COLLECTION

Steelcase Karman, Steelcase Series 2, and Gesture are all available with a CarbonNeutral® product certification option.

# Product Sustainability Stories

## STEELCASE KARMAN

A lighter impact on the planet, Steelcase Karman uses less materials and the least number of components necessary. Weighing only 29 pounds, it's one of the lightest work chairs in the industry.

## COALESSE ENSEMBLE LOUNGE SYSTEM

Coalesse Ensemble supports circular practices through lounge modules on an easy-to-scale rail system and freestanding screens that have zippers allowing for easy assembly and disassembly — enabling future reconfigurability and reuse.

## FLEX PRIVACY WRAP

Using knit to fit, zero-waste technology with less energy, the Privacy Wrap textile is perfectly engineered to fit the unique curves and contours of the screens, eliminating material waste and increasing recyclability.

## ANSWER PANEL SYSTEMS

Answer's durability and frame construction allows for reconfiguration, reuse and an extended useful life now with more planet friendly enhancements including reduction in packaging and using reclaimed paint.

**Steelcase®**
